

LEVEL 1 - CODE WITH BLANKS

```
abstract class Secret {  
    _____ void unlock();  
}  
class Vault extends Secret {  
    @_____  
    public _____ unlock() {  
        // logic  
    }  
}
```

LEVEL 1 - FILLED CODE

```
abstract void unlock();  
@Override  
public void unlock() { }
```

LEVEL 1 - FILLS

abstract, Override, void

LEVEL 1 - OUTPUT

```
LEVEL 1 UNLOCKED  
(reversed/processed riddle)
```

LEVEL 2 - CODE WITH BLANKS

```
class DataBox {  
    public void _____(String input) { }  
    public String _____() { }  
}
```

LEVEL 2 - FILLED CODE

```
setSecret(), getSecret()
```

LEVEL 2 - FILLS

setSecret, isLetter, getSecret

LEVEL 2 - OUTPUT

```
LEVEL 2 UNLOCKED  
IPE
```

LEVEL 3 - CODE WITH BLANKS

```
class AdvancedClue _____ BaseClue {  
    if(i % 2 == ____ ) { }  
}
```

LEVEL 3 - FILLED CODE

```
extends, 0
```

LEVEL 3 - FILLS

```
extends, 0, AdvancedClue
```

LEVEL 3 - OUTPUT

```
LEVEL 3 UNLOCKED  
TUFOLY
```

LEVEL 4 - CODE WITH BLANKS

```
class RealClue extends Base {  
    @_____  
    _____ show() { }  
}
```

LEVEL 4 - FILLED CODE

```
@Override, void show()
```

LEVEL 4 - FILLS

```
Override, void, 1, RealClue
```

LEVEL 4 - OUTPUT

```
LEVEL 4 UNLOCKED  
APGM
```
